PROFESSIONAL EXPERIENCE

Manager – QA & Implementation

Jan 2026 – Present

PayTabs Global | Chennai, India

- Lead QA and implementation activities for digital payment solutions and merchant onboarding initiatives across MENA-region markets.
- Drive PCI DSS compliance validation and payment security testing across payment gateway platforms.
- Manage 3D Secure (3DS2) implementation testing to ensure secure authentication and transaction processing.
- Define QA strategy, test planning, release readiness, and quality governance for business-critical payment programs.
- Collaborate with product, engineering, operations, and external partners to ensure successful delivery of payment solutions.
- Drive automation adoption, API testing practices, process improvements, and quality engineering initiatives.
- Mentor QA engineers and promote continuous improvement across testing and delivery processes.

Assistant QA Manager

Apr 2024 – Dec 2025

PayTabs Global | Chennai, India

- Oversaw implementation and maintenance of PCI DSS compliance; coordinated with internal and external auditors to validate controls.
- Ensured payment systems integrated with 3D Secure (3DS2) protocols; collaborated with developers and vendors on implementation and testing.
- Designed and executed test scenarios to verify functionality and effectiveness of 3DS2 authentication flows and transaction verification.
- Promoted continuous improvement culture by evaluating and enhancing QA processes, tools, and feedback loops for payment solutions.

Technical Lead – QA

Feb 2018 – Mar 2024

Société Générale Global Solution Centre | Chennai, India

- Led QA team with expertise across multiple automation frameworks; drove test automation adoption and quality engineering practices.
- Managed projects from requirements definition through deployment – defining schedules, scope, budget estimates, and risk mitigation plans.
- Partnered with software developers and engineers to ensure development followed established QA processes and worked as intended.
- Coordinated internal and external resources, ensuring projects remained within scope, schedule, and defined budgets across functional departments.
- Structured and managed integrated, multi-track project performance databases for digital and enterprise payment programs.
- Established and maintained client stakeholder relationships, providing day-to-day project status reporting and escalation management.

Technical Lead – QA & Automation

Aug 2015 – Jan 2018

HCL Technologies | Chennai, India

- Developed test strategies, automation plans, and maintained test data frameworks for multiple enterprise clients including Renault/Nissan and Juniper Networks.
- Built and continuously improved automated test suites as new system features and enhancements were developed; managed defect life cycle through fix validation.
- Served as Automation Lead for web-based projects (Renault/Nissan) and virtualisation/automation in JSystem Framework (Juniper Networks Firefly).
- Identified and reported questionable functions, performance concerns, and inconsistencies to product teams; mentored QA engineers in framework usage.
- Contributed to tool selection, technology evaluation, and implementation of practices supporting the overall QA process.

Test Analyst / Test Engineer

Oct 2010 – Jul 2015

Infosys | Chennai, India

- Conducted requirement analysis, developed testing plans, tracked project status, and set up testing environments for banking and financial services projects.
- Designed and developed test scripts, actionized defect prevention plans, and anchored knowledge management activities.
- Prepared Requirements Traceability Matrix (RTM), test cases, and test summary reports; managed defect reporting through full lifecycle.
- Executed test planning and estimation using Microsoft Project Plan; reported daily status to stakeholders on all test activities.

Junior System Engineer

Jul 2008 – Oct 2010

Temenos | Chennai, India

- Performed pre-product release testing of TAFC and wrote InfoBasic programs to verify JBASE database commands.
- Monitored and analyzed log files to identify and troubleshoot software defects in T24 Core Banking System.
- Executed COB runs processing thousands of banking transactions through T24 to verify transaction processing accuracy.
- Documented defects in IBM RTC; participated in code reviews to ensure quality and adherence to coding standards.

EDUCATION

Bachelor of Engineering – Computer Science
Sri Ram Engineering College | Chennai, India

2004 – 2008

CERTIFICATIONS & TECHNICAL SKILLS

Certification: SAFe 5 Agilist (Scaled Agile Framework)
Test Automation: Selenium WebDriver, Java, TestNG, Maven, RestAssured, Postman, Jenkins (CI/CD)
Payments & Standards: ISO 8583, EMV, 3DS2, PCI DSS, Card Switch, Payment Gateway, Merchant Onboarding
Tools & Platforms: JIRA, Confluence, IBM RTC, Firestone, Git, Microsoft Project Plan
Languages: English (Full Professional), Tamil (Native), Telugu (Native)
Domain Experience: Banking, FinTech, Digital Payments, Core Banking (T24/Temenos), MENA Payments Ecosystem
