PROFESSIONAL SUMMARY

Seasoned QA Manager with extensive experience leading cross-functional QA and implementation teams in the payments domain. Currently driving quality strategy and execution for Payment Gateway integrations and 3DS routing across domestic and international card networks in the MENA region. Skilled in defining test governance, automation strategy, and end-to-end validation for complex payment ecosystems. With over 5 years of DevOps experience, I focus on building efficient CI/CD pipelines, optimizing delivery processes, and ensuring high-quality, secure, and seamless payment experiences for clients.

CORE COMPETENCIES

Test Strategy | Payment Card Processing | Payments | PCI DSS Compliance | 3D Secure (3DS2) | Selenium | API Testing | JSystem Framework | Test Automation Framework Design | CI/CD Pipeline Development | DevOps Practices | Build and Deployment Automation | Agile Methodologies

TECHNICAL SKILLS

- **Testing and Quality Assurance:** Test Strategy Development, Test Planning and Execution, Automation Framework Design, Selenium WebDriver, API Testing, Performance Testing, Regression Testing, Integration Testing, End-to-End Testing
- **Payment Systems:** Payment Gateway Integration, Card Payment Processing, Payment Switch Systems, 3D Secure (3DS2) Implementation, PCI DSS Compliance, Transaction Verification, Payment Security Protocols
- **Automation Tools and Frameworks:** Selenium, JSystem Framework, Test Automation, Continuous Testing, Defect Management Tools
- **DevOps and CI/CD:** Continuous Integration, Continuous Deployment, Pipeline Automation, Build Automation, Jenkins, Version Control Systems
- **Project Management:** Agile/Scrum, SAFe Framework, Project Planning, Resource Management, Risk Mitigation, Stakeholder Management
- **Programming and Scripting:** InfoBasic, Test Scripting, Automation Script Development
- **Tools and Technologies:** JIRA, IBM RTC, Firestone, Microsoft Project Plan, Test Management Tools

LANGUAGES

English (Full Professional Proficiency) | Tamil (Native) | Telugu (Native)

PROFESSIONAL EXPERIENCE

PayTabs Global

Assistant QA Manager

April 2024 - Present

Chennai, Tamil Nadu, India

- Oversee the implementation and maintenance of PCI DSS (Payment Card Industry Data Security Standard) compliance within the organization
- Coordinate with internal and external auditors to validate compliance and ensure payment systems meet security standards
- Ensure that payment systems are integrated with 3D Secure protocols (3DS2) to enhance transaction security
- Collaborate with developers and vendors to implement and test 3D Secure features across payment gateways
- Design and execute comprehensive test scenarios to verify the functionality and effectiveness of 3D Secure implementations
- Monitor and resolve issues related to authentication and transaction verification in real-time payment systems
- Promote a culture of continuous improvement by evaluating and enhancing QA processes and tools
- Implement feedback loops and lessons learned to drive better quality outcomes for payment solutions

Societe Generale Global Solution Centre

Technical Lead

February 2018 - March 2024

Chennai Area, India

- Led QA Team with diverse knowledge on different flavors of Automation Framework, ensuring best practices adoption
- Built and developed project teams to ensure maximum performance, providing purpose, direction, and motivation
- Led projects from requirements definition through deployment, identifying schedules, scopes, budget estimations, and implementation plans including risk mitigation
- Worked with software developers and engineers to ensure development follows established processes and works as intended
- Coordinated internal and external resources, ensuring projects remain within scope, schedule, and defined budgets
- Analyzed project progress and adapted scope, timelines, and costs to ensure adherence to project requirements
- Established and maintained relationships with client stakeholders, providing day-to-day contact on project status and changes
- Established and maintained processes to manage scope over the project lifecycle, setting quality and performance standards
- Structured and managed integrated, multi-track project performance databases for multiple digital projects
- Developed and maintained partnerships with outside resources including third-party vendors and researchers
- Monitored and assigned resources appropriately to streamline project efficiency and maximize deliverable outputs
- Reported project outcomes and risks to appropriate management channels, escalating issues as necessary

HCL Technologies

Technical Lead

August 2015 - January 2018

Chennai, Tamil Nadu, India

- Developed test strategies, plans, and maintained automation test data for enterprise applications
- Developed and continuously improved automated tests as new system features and enhancements were developed
- Executed automated tests and managed the resulting defect log through the point of defect fix validation
- Ensured appropriate test environments and infrastructures were in place and kept up to date
- Identified and reported to product teams questionable functions, performance concerns, and inconsistencies
- Documented and mentored QA engineers in the use of testing frameworks and automation tools
- Assisted in the identification, selection, and implementation of tools, technologies, and practices that support the overall QA process
- Contributed to accurate time estimates for automation test development
- Served as vendor for Renault and Nissan Client, designated as Automation Lead for web-based automation projects
- Identified opportunities for automation within software processes and designed QA tests using automated scripts
- Ran tests for databases, systems, networks, applications, hardware and software
- Collaborated with other business units to understand how automation can improve workflow
- Gathered requirements from clients, customers and end-users to develop the best automation solutions
- Led automation efforts for Juniper Networks Project (Firefly host) involving virtualization testing and automation in JSystem Framework

Infosys

Test Analyst / Test Engineer

October 2010 - July 2015

Chennai, Tamil Nadu, India

- Conducted requirement analysis, developed testing plans, tracked project status, and set up testing environments
- Designed and developed testing scripts, actionized defect prevention plans, and anchored knowledge management activities to ensure effective test execution
- Performed transition activities, requirements analysis, project planning and tracking, and test plan design
- Designed test environment setup, test case preparation, test scripting, test execution, implementation, and closure activities
- Managed quality management, knowledge management, and solution development initiatives
- Gathered requirements on all required High Level Design (HLD), Low Level Design (LLD) and Release Note documents from development team
- Performed requirement analysis and identified high level scenarios from documentation
- Designed Requirement Traceability Matrix (RTM) for high level scenarios serving as Test Design Document
- Conducted review meetings once estimation and design documents were in place and incorporated feedback accordingly
- Written test cases for requests that were baselined
- Performed test planning and estimation in Microsoft Project Plan (MPP)
- Executed test cases and reported defects in defect reporting tool (Firestone)
- Sent daily status reports to all stakeholders about test activities carried out on requests
- Re-tested fixed defects and updated status accordingly
- Prepared test closure reports and test summary reports for required requests

Temenos*Junior System Engineer*

July 2008 - October 2010

Chennai, Tamil Nadu, India

- Performed pre-product release testing of TAFC and written InfoBasic programs to verify JBASE Database Commands
- Monitored and analyzed log files to identify and troubleshoot software defects in banking applications
- Executed COB (Close of Business) runs processing thousands of banking transactions through T24 to verify transaction processing
- Documented defects in IBM Rational Team Concert (RTC) and tracked them through resolution
- Participated in code reviews to ensure code quality and adherence to coding standards
- Collaborated with development team to validate database operations and transaction processing accuracy

EDUCATION

Bachelor of Engineering in Computer Science

Sri Ram Engineering College, Chennai, Tamil Nadu, India

2004 - 2008

CERTIFICATIONS

SAFe 5 Agilist (SA) - Scaled Agile Framework Certification
